Professional Summary

Full-stack developer and AI/ML undergraduate with hands-on experience building MERN applications and intelligent systems using NLP, deep learning, and LLM APIs. Skilled in React, Node.js, Python, and JavaScript with a strong foundation in DSA. Passionate about crafting user-focused enterprise products at the intersection of web development and AI. Seeking a MERN Stack Intern role to contribute to impactful, production-grade solutions.

Education

Keshav Memorial Engineering College, Hyderabad B.E CSE (AI & ML), CGPA: 7.6	May 2027
Vaishnavi Junior College Intermediate (MPC), 97.3%	2023
Mother Teresa High School SSC, GPA: 10	2021

Technical Skills

Languages: Python, Java, JavaScript, SQL
Web: HTML, CSS, Node.js, Express.js, REST APIs
Databases: MongoDB, PostgreSQL
Tools: Docker, Drizzle ORM, Git, GitHub, VS Code

Projects

URL Shortener Service	<i>Node.js, Express.js, PostgreSQL, Drizzle ORM</i>
- Developed a scalable URL Shortener service with short link generation, redirection, and click-tracking functionality. - Built RESTful APIs using Node.js and Express.js following MVC architecture principles. - Integrated Drizzle ORM with PostgreSQL for efficient, type-safe database access and schema-driven development.	
AI Quiz Generator	<i>JavaScript, Node.js, MongoDB, Gemini API</i>
- Built a full-stack AI-powered quiz platform integrating the Gemini API for dynamic quiz generation across customizable topics and difficulty levels. - Designed a responsive React interface with real-time quiz generation, dynamic difficulty adjustment, and instant feedback. - Implemented secure user authentication and managed quiz data and user responses using the MERN stack.	
Pneumonia Detection using CNN	<i>Python, TensorFlow, Deep Learning</i>
- Developed a CNN-based deep learning model for pneumonia detection achieving 92% accuracy on chest X-ray datasets. - Applied image preprocessing and data augmentation techniques to improve model generalization and reduce overfitting. - Trained and evaluated the model end-to-end using TensorFlow with precision, recall, and F1-score benchmarking.	

Achievements

- HackerRank SQL (Intermediate)** – Certified in SQL querying and database operations
- Apna College DSA Certificate** – Completed structured DSA curriculum covering core algorithms
- LeetCode** – Solved 100+ coding problems and strengthened problem-solving skills

Additional Information

- Strong problem-solving and debugging skills with focus on clean and maintainable code.
- Quick learner with ability to adapt to new technologies and fast-paced engineering environments.
- Passionate about building products combining full-stack engineering with AI-driven capabilities.
